SOCIO EMOTIONAL LEARNING OUTCOME (SELO)

SELO

Project Duration

4 Months

Project Beneficiaries

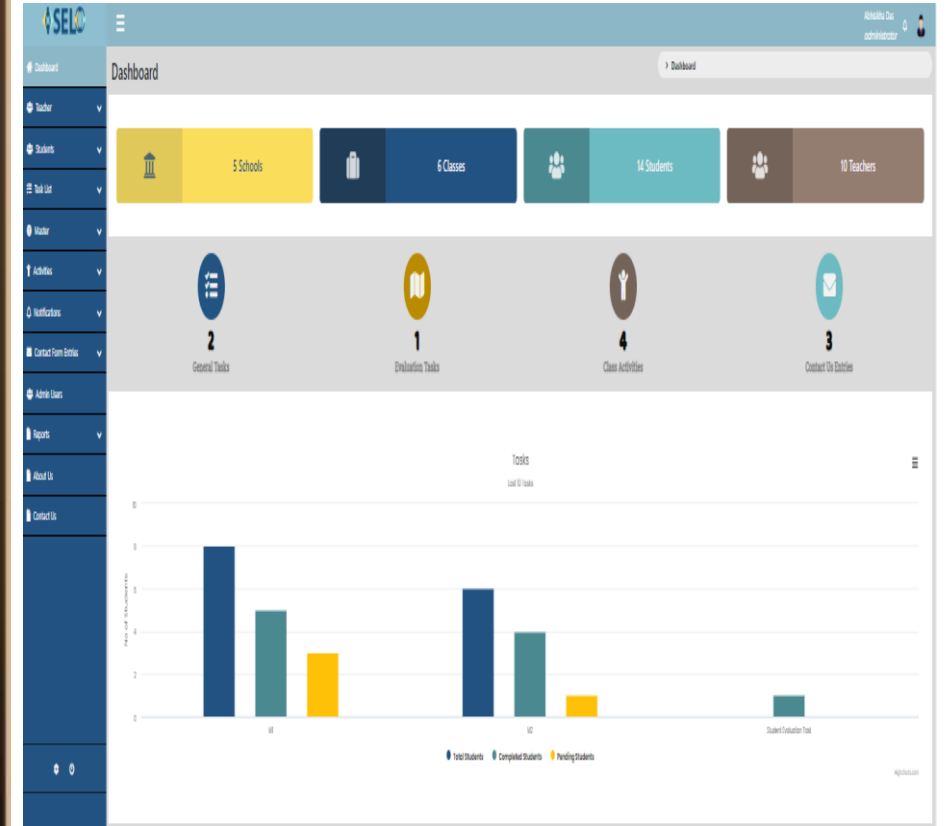

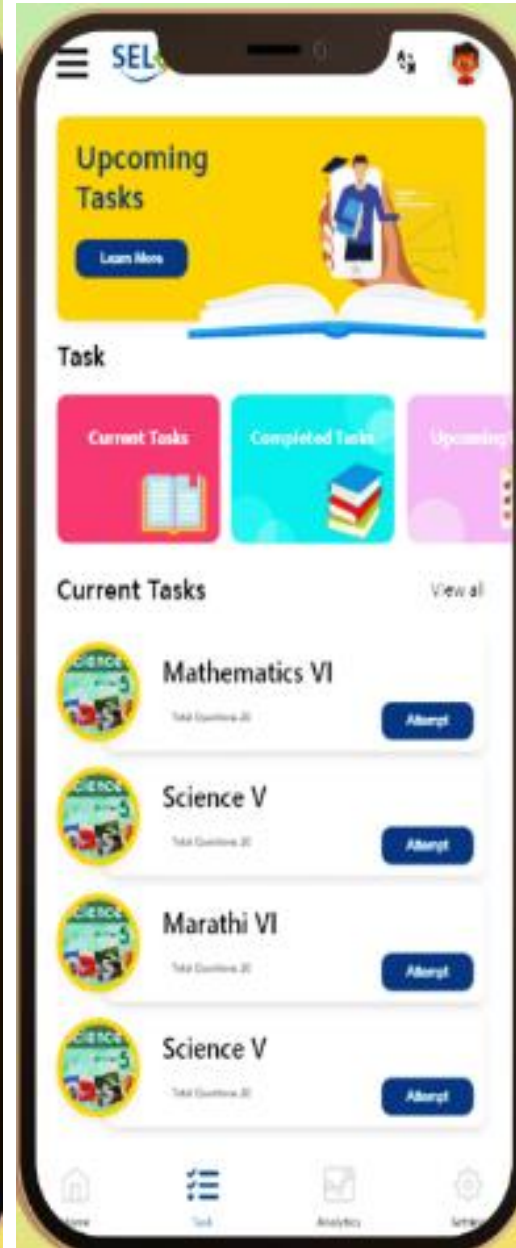

Students,
Citizens, PMC

Completion Date

Aug 2022

Project Status

UAT Ongoing

A digital intervention to measure socio emotional learning levels of students in hybrid learning system, Pune Smart City Development Corporation (PSCDCL) has implemented “SELO” a psychosomatic monitoring initiative.

- The project involves evaluation of students and our target groups on multiple psychosomatic upheavals
- The idea is to make this process self-sustainable & people-driven through an app, SELO.
- The app will be primarily used to capture the data, to analyze and to represent to use the toolkit designed as marking/assessments/unit of evaluation/scale students on their Socio-Emotional skills

Key Features:

- ❑ *a self-driven, customized and adaptive learning software* to successfully improve learning outcomes in children's with activities crafted by teachers and academicians.
- ❑ *Quick/Self evaluation, Notes/Summary* for further improvements and focus
- ❑ Emotional Intelligence and improvisation based on the needs and assessment data collected from student learning and monitoring activity participation.
